DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because . Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-27 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest one or more of the limitations found in independent claims 1 and 4. U.S. Patent No. 5,327,149 to Kuffer teaches a similar system to that of the present application. However, with respect to independent claim 1, Kuffer fails to teach or suggest the combination of RF sensor means; first optical sensor means; second optical sensor means; wherein the RF sensor means and the first optical sensor means are located at the focal region on an opposite side of the secondary mirror assembly from the second optical sensor means. With respect to independent claim 4, Kuffer fails to teach or suggest the combination of an RF sensor

assembly; a laser energy sensor assembly; an infrared energy sensor assembly; wherein the RF sensor assembly and the laser energy sensor assembly are located at the focal region on an opposite side of the secondary mirror assembly from the infrared energy sensor assembly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Pertinent References

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patent documents further show the state of the art with respect to multi-mode sensor systems:

- a. U.S. Patent No. 4,477,814 to Brumbaugh et al.
- b. U.S. Patent No. 4,652,885 to Saffold et al.
